# European Standards

**EN 17353**

**Enhanced visibility equipment for medium risk situations**

---

EN 17353 specifies the requirements applicable to clothing and accessories with increased visibility for situations of medium risk.

Increased visibility clothing and accessories are intended to offer visibility to the wearer in medium risk situations in any daylight conditions and/or under the illumination of vehicle headlights or spotlights in the dark.

**EN ISO 20471**

**High visibility clothing**

---

The high-visibility clothing is intended to provide conspicuity of the wearer in any light condition when viewed by operators of vehicles or other mechanized during daylight conditions and under illumination of headlights in the dark. The use of a high-visibility piece of garment does not guarantee full visibility of the user under all conditions. High-visibility clothing is divided in three classes, depending on the minimum surfaces of visible material.

**CLASS 1:** They are used in activities that allow the wearer to be viewed completely without hesitance from approaching vehicles. There should be enough distance between the worker and the traffic, which should not travel at more than 40 km/h.

**CLASS 2:** Their use is applied to situations where a greater visibility is needed, under bad weather conditions or situations where the workers carry out tasks that could distract their attention from the approaching traffic or situate them close to vehicles travelling at more than 40 km/h.

**CLASS 3:** They are used by those workers who are exposed to a great danger in high work load situations, bad weather conditions or speed traffic of more than 80 km/h.

## **EN ISO 13688** **General requirements**

---

Protective clothing replaces or covers personal clothing and is designed to provide protection against one or more hazards. This standard regulates the general requirements of ergonomics, safety, size designation, aging, compatibility and marking of protective clothing and the information that the manufacturer has to provide with the clothing.

## **EN 343** **Protection against rain**

---

The European standard EN 343 specifies the requirements and test methods applicable to the materials used and to the seams made to make protective clothing against rainfall in the form of rain, snow, fog and soil moisture with temperatures up to -5 °C. The standard, in addition to the criteria suitable for defining excellent waterproofing, defines the comfort criteria of the garment that will be intended for both work and leisure.

## **EN 14058** **Garments for protections against cool environments**

---

EN 14058 specifies the requirements and test methods for the performance of garments for the protection of the body against the effects of cold environments with temperatures above -5 °C. These effects include not only low air temperatures, but also humidity and air velocity.

# Specifications flame retardant garments

**EN ISO 11612**  
**Clothing to protect against heat and flame.**  
**Minimum performance requirements**

---

Protective clothing that complies with this European standard is intended for a wide range of application which offer limited flame spread and provide protection against various hazards including radiant heat, convective heat and splatters of molten metal.

**EN ISO 1149-5**  
**Electrostatic properties**

---

This European Standard specifies material and design requirements for electrostatic dissipative protective clothing, to avoid incendiary discharges. The material and design requirements may not provide sufficient protection in oxygen enriched flammable atmospheres. This European Standard is not applicable for protection against mains voltages.

**IEC 61482-1-1**  
**Protective clothing against the thermal hazards of an electric arc**

---

This standard is applicable to protective clothing used in work where there is the risk of exposure to an electric arc hazard. This type of clothing protect the wearer against the different effects derived from the exposure to this kind of hazard.

**EN ISO 11611**  
**Protective clothing for use in welding and allied processes**

---

This standard specifies the minimum basic safety requirements and test methods for protective clothing to be worn during welding and allied processes with comparable risks. This type of protective clothing is intended to protect the wearer against spatter, short contact time with flame, radiant heat from an electric arc used for welding and allied processes, and minimizes the possibility of electrical shock by short-term during accidental contact.

# OUR CERTIFICATES

## QUALITY AND COMMITMENT

We have national and international certificates that guarantee the quality of our products and our commitment to society. We comply with all requirements of the EU legislation and regulations and we manufacture responsibly all of our products.

### ISO 9001: 2015

Is a globally recognized standard for quality management. It helps organizations of all sizes and sectors to improve their performance, meet customer expectations and demonstrate their commitment to quality. Its requirements define how to establish, implement, maintain, and continually improve a quality management system (QMS).

### ISO 14001: 2015

Helps an organization achieve the intended outcomes of its environmental management system, which provide value for the environment, the organization itself and interested parties. Consistent with the organization's environmental policy

### ISO 45001: 2018

Specifies requirements for an occupational health and safety (OH&S) management system, and gives guidance for its use, to enable organizations to provide safe and healthy workplaces by preventing work-related injury and ill health, as well as by proactively improving its OH&S performance.

### ISO 28000: 2007

Specifies the requirements for a security management system, including those aspects critical to security assurance of the supply chain. Security management is linked to many other aspects of business management. Aspects include all activities controlled or influenced by organizations that impact on supply chain security. These other aspects should be considered directly, where and when they have an impact on security management, including transporting these goods along the supply chain.

### GOTS

The Global Organic Textile Standard (GOTS) is the worldwide leading textile processing standard for organic fibres, including ecological and social criteria, backed up by independent third-party certification of the entire textile supply chain.

### OCS 100

OCS certification applies to all supply chain sites of organically grown content: first processor, manufacturing, packaging and labeling, storage, handling, and shipping through the seller in the last business-to-business transaction. OCS 100 product may have a minimum of 95% and a maximum of 100% certified content.

### OCS BLENDED

OCS certification applies to all supply chain sites of organically grown content: first processor, manufacturing, packaging and labeling, storage, handling, and shipping through the seller in the last business-to-business transaction. OCS Blended product may have a minimum of 5% and a maximum of 94% certified content.

### GRS

Standard that sets requirements for third-party certification of Recycled Content, chain of custody, social and environmental practices, and chemical restrictions.

### AEO

As an "Authorized Economic Operator", Roly is certified as a reliable importing and exporting company for customs authorities throughout the world, which facilitates the transit of the goods we commercialize.

### OEKO-TEX

Most Roly products have this certificate that guarantees their commitment to all environmental requirements during the manufacturing process and that the fabrics, their dyes and any component of the garment, do not contain harmful or dangerous substances.

### ILO

All factories which manufacture our products observe the requirements of Geneva Convention of November 1973 nº 138, which regulates the minimum age for employing minors.

### FAIRTRADE

Fairtrade achieves this by rallying a global community of millions – farmers and workers, supply chain partners, brands, retailers, shoppers, schools, government – to pay fair prices and uphold fair production standards and practices.

### PEFC

Roly is a member of PEFC, a program that promotes the sustainable management of forests to achieve a social, economic and environmental balance, which is why the paper used in this catalogue, and of most of the material printed by the company, is obtained from wood from sustainable forests.

### REACH

REACH is the new European Union legislation applying to chemical substances, and its aim is to improve the protection of human health and environment from the risks arising from the use of chemicals.

### VEGAN

We comply with PETA Approved Vegan Certificate. That means that our products are free of animal cruelty. We guarantee that neither our products nor our manufacturing procedures involve animal abuse, animal tissues or animal tests

### TAPA

The Transported Asset Protection Association prevents transportation crimes, cargo theft and loss of goods in the supply chain.

### SMETA 4 PILLARS

Audit that covers the Labor and Healthy & Safety standards of the 4-pillar audit, as well as Environmental Assessment and Business Ethics.

### SEDEX

Sedex is a global technology company that specialises in data, insights and professional services to empower supply chain sustainability. Environmental management system. Provide safe and healthy workplaces by preventing work-related injury and ill health, by proactively improving.

### SA 8000

With the international SA8000 certification standard, we develop, maintain and apply socially acceptable practices in the workplace.

### WCA

The Workplace Conditions Assessment (WCA) programme seeks to improve the working conditions efficiently and in accordance with widely accepted industry standards and best practices.

# ICONOGRAPHY

## new

### NEW PRODUCT

This item is new in the catalogue.

### NEW COLOUR

This icon indicates that the article is presented in a new colour in this catalogue.

## NEW SIZE

### NEW SIZE

Item with a new size in this catalogue. Indicates also which item it is.

### CARTONS

Number of units in the box.

### BREATHABLE TECHNICAL FABRIC

Fabrics with breathability and comfort features specific for sports activities.

### ADHESIVE LABEL

Vinyl label that can stick and peel off easily during the marking process.

### PROTECTION FOR USE IN WELDING

EN ISO 11611

### PACK

Number of units in the pack.

### STRECH FABRIC

Fabric with elastane.

### REMOVABLE LABEL

This label can be removed without unpicking the covered seams.

### FIREPROOF PROTECTION

EN ISO 11612

### CLEANING

Workwear garment suitable for use in cleaning and hygiene.

### WATERPROOF

Fabric prepared to repel water, preventing it from trespassing to the garment.

### HI-VIZ

Model with high-visibility properties that complies with EN 20471.

### PROTECTION AGAINST THERMAL HAZARDS OF AN ELECTRIC ARC

IEC 61482

### HEALTHCARE

Workwear garment suitable for use in nursing, pharmacy or general medicine.

### RECYCLED COTTON

Fabric made of recycled cotton.

### NIGHT VISIBILITY

Model with visibility properties that complies with EN 17353.

### ELECTROSTATIC PROTECTION

EN ISO 1149-05

### FOOD INDUSTRY

Workwear garment suitable for use in the hotel and retail trade.

### UNISEX

Model suitable for both men and women.

### REVERSIBLE

Reversible garment.

### EN 343

Protection against rain.

### LABORATORY

Workwear garment suitable for the use in laboratories.

### DUO CONCEPT

This article has its equivalent for the other gender.

### WATER RESISTANT

Special treatment that minimizes the erosive effect of water on the fabric of the garment.

### EN 14058

Protective clothing for cold environments.

### BEAUTY

Workwear garment suitable for use in hairdressing and beauty salons.

### OPTIONAL POCKET

Includes an optional pocket to be added in the garment.

### WINDPROOF

Fabric treatment that prevents the wind trespassing to the garment.

The colours in this catalogue are as approximate and faithful as possible to the actual colours of our products, with the limitations of the colour printing in paper. In addition, due to the constant improvements on the products and renovations of stock, the colours may suffer changes or modifications not shown in this document. Claims based on the colours in this catalogue will not be accepted. ROLY reserves the right to change without previous notice the colours of the products with respect to the indicated in the present catalogue.
